<b>Natural Income</b> <i>Natural income is income produced by assets that is 'automatically' paid to the client's bank account, without a deduction in value. It is distinctly different to other 'automated income payments' which pay a pre-set value (£ or %) as natural income fluctuates to reflect the different level of income being produced by the underlying assets (for example, dividend income).</i> <b>1</b> Natural income not available <b>5</b> Natural income available	<b>Income Frequency</b> <i>Regular income payment frequencies</i> <b>1</b> one of a, hy, t, q, m, ad hoc <b>2</b> two of a, hy, t, q, m, ad hoc <b>3</b> three of a, hy, t, q, m, ad hoc <b>4</b> four of a, hy, t, q, m, ad hoc <b>5</b> five of a, hy, t, q, m, ad hoc
<b>Bare or Absolute Trusts Available</b> <i>Bare or Absolute Trusts Available</i> <b>1</b> Bare or absolute trusts not available <b>5</b> Bare or absolute trusts available	<b>Discretionary Trusts Available</b> <i>Discretionary Trusts Available</i> <b>1</b> Discretionary trusts not available <b>5</b> Discretionary trusts available

## Notes

KEY: na = not applicable, ns = not stated, nd = not disclosed

The Data Numerical Analysis (DNA) allows the analysis of data on both a quantitative and a qualitative basis, showing not only who does what, but more importantly, how well they do it. This is achieved by a system of benchmarking or ranking on a 1 to 5 basis called DNA. A score of 1 indicates a weak feature; a score of 5 indicates an excellent feature.
